Our Durham jacket was developed for riders who prefer gear equipped with waterproof exteriors. This jacket also offers strategically placed venting at the shoulders, upper arms and back torso panels. This winning combination provides protection from the elements and enhances multi season riding comfort.

- Outer Shell constructed in a combination of 600 D poly EVO THREAD™ fabric and 1000 D ballistic poly reinforcement panels.
- Cool mesh airflow lining.
- Waterproof membrane.
- Fold back ventilation System at chest, upper arms and back.
- Double storm placket front closure.
- Removable CE Motion Flex armor at elbows and shoulders.
- Removable CE approved Motion Flex articulated back protector.
- Custom fit detailing at collar, cuffs, elbows and waist.
- Full circumference neoprene collar insert.
- Reflective heat weld detailing at front, sides and back.
- 8" connecting zipper for pants.
- Five exterior zipper pockets and two interior stash pockets.
- Full sleeve zip out INSULEX™ thermal layer with two storage pockets.
- Quality YKK zippers.

Outer Shell detailing consists of a rugged exterior cut in a combination of 600 D poly EVO THREAD™ fabric and 1000 D ballistic poly reinforcement panels at the elbows and shoulders for exceptional abrasion resistance. Durham's venting system allows air to flow between the outer shell and the waterproof membrane, cooling the inside of the jacket. A cool mesh lining is placed over the membrane for added comfort. Four exterior zipper pockets, two interior stash pockets and an oversized waterproof back pocket offer plenty of storage for personal items. Additional features include a double storm flap front closure plus reflective heat weld detailing at the front, sides and back for added visibility in low light situations. Accordion style stretch panels located at the back body torso panels accommodate a variety of riding positions.

Removable thermal layer detailing consists of a full sleeve INSULEX™ thermal liner equipped with two large interior storage pockets. This cozy thermal layer is both lightweight, packable and enhances multi-season riding comfort.

VENTING SYSTEM

Shoulder to forearm venting plus vertical back vents with fold back vent covers create airflow and offer protection from the elements when you need it.

ZIP OUT FULL SLEEVE THERMAL LAYER

This handy INSULEX™ thermal layer is lightweight and packable to ensure multi-season riding comfort.
