WP510B BLACK

EVO THREAD™ CE INSULEX™ AquaRes™ YKK™

Designed to coordinate with our women's Durham jacket, this multi-functional style is cut in a women's specific fit and can be worn as stand-alone riding pants or as a full over pants. It's also equipped with a removable thermal layer to ensure multi-season riding comfort.

- Outer Shell constructed in a combination of 600 D poly EVO THREAD™ fabric and 1000 D ballistic poly panels.
- Waterproof membrane.
- Storm flap covered full side leg zippers extend to waistband.
- Storm flap front fly detail.
- Removable and adjustable height CE Motion Flex armor at knees.
- Removable EVA compression foam at hips.
- Cool mesh airflow lining.
- Custom fit detailing at waist and bottom hem.
- Reflective piping side leg detail.
- Relaxed tailored fit.
- 2 zipper side entry storage pockets.
- 8" connecting zipper for jackets.
- Removable INSULEX™ thermal layer.
- Quality YKK brand zippers.

Outer Shell detailing consists of a sleek exterior cut in a combination of abrasion resistant 600 D poly EVO THREAD™ fabric and 1000 D ballistic poly reinforcement panels at the seat and knees. A waterproof membrane is concealed under the outer shell for wet weather rides. A cool mesh lining is placed over the membrane for added comfort when wearing these pants with shorts or skivvies. Two flap covered water tight side entry pockets offer secure storage for personal items. Standing, boot on entry is a breeze as storm flap covered side leg zippers extend all the way to the waistband. Additional features include a storm flap fly closure, stretch waist panels with side waist adjuster straps and reflective piping down the side legs for added visibility in low light situations. Accordion style stretch panels are located at the back waist and knees to accommodate a variety of riding positions. Adjustable knee armor positions and our EZ-hem bottom detail helps riders achieve a customized fit.

Removable thermal layer detailing consists of an INSULEX™ thermal liner that is both lightweight and packable for enhanced multi-season riding comfort.

REMOVABLE INSULATED THERMAL LAYER

This handy INSULEX™ thermal layer is lightweight and packable for enhanced multi-season riding comfort.
