Since our humble beginnings almost 15 years ago, Olympia Moto Sports has grown steadily to become an important player in the premium riding apparel segment. From the outset, we’ve continually listened to consumer concerns and preferences. This valuable knowledge has helped us stay ahead of the curve, guided our design approach and helped us create high quality, affordable apparel. Educated consumers are our best customers, so we encourage you to shop and compare before making your next apparel purchase.

Our core values have always included an emphasis on premium components and unique features. These crucial elements have been the cornerstone of our success from day one and we’ll continue to highlight these characteristics as we enter exciting new segments in the very near future.

The use of high quality components has always been a significant element of Olympia’s core values. In addition, we also strive to integrate a wealth of useful features in each garment, all at an affordable price.

Olympia riding jackets offer major adjustability at the collar, cuffs, waistband and elbows, as we know the importance of ergonomic, comfortable and well-positioned body armor. These elements are essential for motorcycle apparel to function effectively. Olympia riding pants offer flexible waist bands, our exclusive EZ-Hem bottom detail and do-it-yourself adjustable height knee protectors.
4 DISTINCT PRODUCT GROUPS OFFERS THE PERFECT GEAR FOR ANYRIDE

MESH TECH GEAR

Two key design elements set our Mesh Tech Gear apart from the competition. Firstly, there’s uncompromised quality. All styles in this collection are reinforced with strategically placed panels of authentic abrasion resistant nylon or polyester for enhanced strength and durability. Our mesh based ballistic material is engineered with a durable double knit construction that delivers added safety without sacrificing maximum airflow. Secondly, there’s unsurpassed multi-functionality. In addition to classic warm weather gear, select products in this group include our Three Layer System Design with removable waterproof liners and insulation layers that offer protection from the elements as you need it. This allows these styles to function extremely well in excessive heat, moderate cold and a variety of unpredictable weather patterns. As an added bonus, packing personal gear while traveling light is a snap as these liners pull double duty as great looking functional sportswear.

TRANSITION GEAR

As global touring and dual sport riders we constantly face harsh conditions brought on by ever changing micro-climates and weather patterns. For maximum rider comfort, adjustable venting, combined with multi-functional base layers are a must. Our Transition Gear employs our exclusive drop down Mega Vent Panel system that converts a solid body garment to adjustable airflow construction in seconds. This gear is also equipped with technical base layers that provide waterproof protection and insulating properties as you need them.

Compare our venting and liner systems with the competition and you’ll see why this is the best all season, all weather riding gear available. From blistering desert heat to icy rainy swept mountain passes, our Transition Gear delivers unmatched levels of comfort, function, durability and style.
LEATHER GEAR

Olympia combines rider specific function and fit with superior quality to deliver features not offered in standard leather riding gear.

Our leather jackets are cut in supple, performance grade 1.1 to 1.2 mm cowhide. Key features include adjustable waist details, pre curved sleeves and an ergonomic fit created with North American riders in mind.

Additional features include zippered exterior pockets for secure storage, low profile race style collars, zippered forearm to wrist cuff closures, interior Napoleon stash pockets, moisture wicking mesh linings and full sleeve zip out insulation layers to insure multi season riding comfort.

WATERPROOF GEAR

For many riders, gear equipped with waterproof exteriors are an absolute must. Our waterproof gear offers airflow when you need it and maximum protection from the elements when you don’t. Select items in this group are equipped with our unique Two Layer System Design offering removable liner jackets that double as stand-alone sportswear.

Our Horizon rain gear is cut in light weight, self-packing rip stop nylon. It also offers a superior ergonomic fit plus unmatched function and style to boot.
TECHNICAL FEATURES

CUSTOM FIT DETAILING
An ergonomic, comfortable fit and well positioned body armor is essential for motorcycle apparel to function effectively. Because all riders are built differently, adjustability is a primary factor to look for when selecting riding gear. Olympia helps riders achieve a customized fit by offering adjustable collars, cuffs, waistbands, elbow armor adjusters, EZ-Hem bottom detailing and three-tier do it yourself adjustable knee armor positions.

AUTHENTIC CORDURA® FABRIC
Due to outstanding abrasion resistance and durability, Cordura® performance fabric is a key element found only in top quality motorcycle apparel. Cordura is 2 to 14 times more durable than imitation nylon and polyester fabrics. We’ve tested fabrics used by our competitors but none come close to the heat and abrasion resistance of authentic Invista Cordura®.

AUTHENTIC THERMOLITE® INSULATION
Special thermal bonded fibers provide a high level of warmth with minimal bulk and weight. Thermolite® insulation features exceptional softness, flexibility and durability.

CE APPROVED MOTION FLEX ARTICULATED ARMOR
Standard issue in Olympia garments, the CE mark embossed on our armor certifies that it has been submitted for lab testing and has passed rigorous guidelines required for use in European markets. It’s articulated dual density construction offers a robust outer shell with a shock absorbing interior for maximum flexibility, comfort and protection.

QUALITY YKK® ZIPPERS
Highly regarded for their strength and durability, YKK sets the standard for quality zippers.

3M SCOTCHLITE™
This highly reflective material greatly enhances a rider’s safety at night and in low visibility situations by reflecting light back to the original source.

AQUARES
Micro pores in the AquaRes membrane offer a waterproof / windproof / breathable barrier that allows sweat vapor to escape while keeping the wearer comfortable and dry.

EVO THREAD
Highly durable, abrasion resistant polyester, conceived for high performance gear. This innovative fabric is also lightweight and flexible, offering a perfect mix of comfort, performance and long-lasting reliability.

INSULEX
Conceived with warmth in mind, but delivers so much more. The lightweight microfibers also contribute to a less bulky garment and allow for an increased range of motion. Cold weather rides will never be a hindrance again.

TECHNICAL FEATURES

- Outer shell constructed in rugged rip stop nylon with ballistic airflow mesh panels.
- Designed to military specifications with authentic 3M Scotchlite™ reflective panels.
- Two storage pockets plus interior cell phone pocket.
- See through vinyl ID chest pocket.
- Custom fit side body and waist straps.
- Comfort micro fiber lined collar.
- Cool mesh airflow lining.
- Drop back waist detail.

CONSTRUCTION DETAILS

Cut in rugged rip stop nylon with ballistic airflow mesh panels, it offers maximum cooling and packs away easily via a hidden storage pocket located inside the front torso zipper. Engineered to be worn over any motorcycle jacket, a custom fit can be achieved by utilizing adjuster straps located at the side body and waist panel. A see-through ID chest pocket, plus six oversized 3M Scotchlite™ panels and full back retro reflective detailing qualify this vest for use by military personnel.

3 LAYER SYSTEM DESIGN ALLOWS FOR EASY CUSTOMIZATION BY SIMPLY ADDING OR REMOVING APPROPRIATE LAYERS

LAYER 1
Consists of a rugged 600D EVO THREAD™ shell equipped with our exclusive Mega Vent Panel System. This system allows the jacket to transition from solid body, to adjustable airflow construction in seconds by lowering oversized zipper panels at the chest, arms and back.

LAYER 2
Consists of a fully functional waterproof / breathable AquaRes™ laminated rain jacket cut in sturdy rip stop nylon. This jacket can be worn over or under the main outer shell, as weather conditions dictate.

LAYER 3
Consists of a removable full sleeve thermal layer, constructed with cozy INSULEX™ insulation. This layer can be zipped into the main outer shell or the rain jacket shell, as needed, and includes an oversized interior storage pocket. This handy zip-out feature ensures multi-season riding comfort through a wide range of temperatures and weather conditions.
A waterproof exterior combined with exceptional airflow allows the Richmond jacket to function extremely well over a wide range temperatures. Our ADVANCED VENTING SYSTEM cuts through the jackets out shell and interior membrane to create direct airflow to a rider’s body.

This insulation layer can be zipped directly into the main outer shell or the rain jacket shell to ensure multi-season riding comfort.

Fold up chest pocket flaps and velcro lock down torso straps hold chest zipper vents open to create adjustable air flow.
TECHNICAL FEATURES

- Outer Shell constructed in a combination of 600 D EVO THREAD™ poly fabric and 1000 D ballistic poly panels.
- Six vent adjustable Airflow Ventilation System.
- Velcro lock down straps at shoulder vents to maximize airflow.
- Waterproof / breathable Reissa® membrane.
- Cool mesh airflow lining.
- Double storm placket front closure.
- Removable CE Motion Flex armor at elbows and shoulders.
- Removable CE approved Motion Flex articulated back protector.
- Custom Fit detailing at collar, cuffs, elbows and waist.
- Reflective heat weld detailing at front, sides and back.
- Seven exterior zipper pockets and two interior stash pockets.
- Stow away under helmet hood with 360 neck gator.
- Full sleeve zip out INSULEX™ thermal layer with two storage pockets.
- Quality YKK zippers.

CONSTRUCTION DETAILS

OUTER SHELL DETAILING consists of a rugged exterior, cut in a combination of 600 D poly EVO THREAD™ fabric and 1000 D ballistic poly panels located at the elbows and shoulders for exceptional abrasion resistance. A waterproof / breathable seam sealed Reissa® membrane is concealed under the cool mesh lining to tackle wet weather rides.
Our Durham jacket was developed for riders who prefer gear equipped with waterproof exteriors. This jacket also offers strategically placed venting at the shoulders, upper arms and back torso panels.

**INSULEX™ INSULATION LAYER**
This insulation layer can be zipped directly into the main outer shell or the rain jacket shell to ensure multi-season riding comfort.
DURHAM
FOR RIDERS WHO PREFER GEAR EQUIPPED WITH WATERPROOF EXTERIORS

MJ506 SIZES: S - 4XL USA $199.99

**Technical Features - Jacket**

- Outer shell constructed in sturdy lightweight, waterproof, breathable rip stop nylon.
- Back overhang detail with hidden mesh panel insert for improved breathability.
- Stow away hood with 360 neck gator concealed inside collar.
- EZ-Pack Storage System: Jacket can be stowed away in a self-contained storage pocket located in the interior of the jacket.
- Double storm placket front closure with two way zipper.
- Adjustable velcro closure straps at the elbows and wrists, plus slide buckles at waist and a shock cord bottom detail offer maximum adjustability.
- Two exterior waterproof pockets and inside storage pocket.
- Micro fiber lined collar for added comfort.
- 3M Scotchlite® reflective piping at front, back and side arms offer enhanced visibility.
- Cool mesh airflow lining.

**Technical Features - Pants**

- Outer shell constructed in sturdy lightweight, waterproof, breathable rip stop nylon.
- EZ-Pack Storage System: Pants can be stowed away in a self-contained storage pocket located in the interior of the pants.
- Intake velcro closure panels at lower legs offer easy boot on entry and adjustment of leg width.
- Slide waist buckles, plus stretch waist details offer maximum adjustability.
- Authentic Nomex heat shields located at inside lower legs.
- Cool mesh airflow lining.
Kanto is cut in a combination of performance grade 1.1 to 1.2 drum dyed, top grain cowhide and breathable, abrasion resistant stretch knit fabric. A sporty yet ergonomic fit offers added comfort and proper sizing for North American riders, while pre-curved sleeves and elasticized leather detailing inserted at the side, back and elbow panels enhance overall flexibility.

**INSULEX™ REMOVABLE LAYER**
Consists of a sleeveless INSULEX™ thermal liner equipped with a large zippered interior storage pocket and oversized cell phone pocket. This cozy thermal layer is both lightweight and packable to ensure multi-season riding comfort.
KANTO

MJ621 SIZES: S - 4XL USA $369.99

TECHNICAL FEATURES

• Outer shell constructed in 1.1-1.2 top grain cowhide.
• Insulex™ removable thermal layer.
• SW CE certified elbow and shoulder protectors provide lightweight and great impact protection.
• Removable SW CE certified back protector grant flexibility and high protection.
• Cool mesh airflow lining.
• Pre-curved sleeve construction helps reduce riding fatigue. Accordion and stretch knit insert for true comfort.
• Comfort neoprene framed collar.
• 3M Scotchlite® reflective insert at front, sleeves and back.

CONSTRUCTION DETAILS

• Internal waist connection zipper allows attachment to riding pants. Velcro and D-ring waist adjustments for a secure and customized fit. Velcro wrist cuff closures and zippered sleeve opening allow further fine-tuning of garment’s fit.
• Five storage pockets and an interior cell phone pocket. Lower rear profile design offers lumbar coverage and prevents jacket from riding up over pants.

DELIVERS SPORTY, SLEEK STYLING COMBINED WITH MODERN, RIDER SPECIFIC FUNCTIONS.

LEATHER CHASSIS
Bishop is cut in supple performance grade 1.1 to 1.2 drum dyed, top grain cowhide. This leather is infused with our unique LUX waxed finish to give it a smooth and slightly polished, yet distinctly retro look.

OLYMPIAMOTOSPORTS.COM 45
Our inspiration for this design was drawn from retro machines of days gone by and the café racers who dared risk initiation into the elusive “Ton Up Club”.

**INSULEX™ REMOVABLE LAYER**

**HOW TO MEASURE TIPS:**

**HEAD:** Measure circumference of head just above top of ears, and 1 inch (2.54 cm) above eyebrows.

**SLEEVE:** With your arm fully extended, measure from the center back of neck at spine to the wrist bone.

**CHEST:** Measure under arms around the fullest part of the chest. Be sure to keep tape level across back and comfortably loose.

**WAIST:** Measure around natural waist with a loose tape.

**HIP & SEAT:** Place the measuring tape around the body at the fullest part of the lower hip, feet together.

**INSEAM:** Without shoes; measure on inside of leg from groin to the floor.
Olympia products are warranted to be free of defects in workmanship and materials originating from the point of manufacture for a period of one year from the original date of purchase. Should a warranty claim arise, the consumer can return the product with the proof of purchase to their dealer. The dealer will then return the item to Olympia for claims evaluation. If Olympia deems the item to be defective it will be repaired or replaced at no additional cost to the consumer. Olympia Moto Sports will not be liable for damages or expenses arising from the direct or indirect use of their products except to retail or replace as covered under this warranty. This warranty is in lieu of all other warranties expressed or implied. MSRP info: Manufactures suggested retail prices are subject to change without notice. Price listed in this catalog do not include freight or handling charges. Olympia reserves the right to adjust pricing and product specifications without prior notice.
